Commuting Pie (Circle) Graphs Worksheet 2

Directions: A middle school surveyed its students to find out how they commute to school every day. The data of the survey are presented in the following pie graph. Study the pie graph and answer the following questions.

1. If 100 students responded to the survey, how many students were car riders?

2. If 200 students responded to the survey, how many are either bike or car riders?

3. Which was the most common way of commuting among the students?

4. Which was the least common way of commuting among the students?
Answer Key

1. 20

2. 100

3. Bus

4. Walk
